ABOUT KIDS CLUB

The mission of KIDS CLUB is to provide an educational, active and fun experience for your kindergarten through sixth grade child. Our program aims at stimulating the child both physically and intellectually in a well-supervised, fun setting by engaging the child in a diverse set of healthy activities. Your child will gain confidence, learn independence skills, and discover the fun of learning. Most importantly, Kids Club wishes to slash the time your child spends on watching TV or playing video games

Give your children an experience they can build on and use their entire life! Let your children discover potential they did not know they had!

CLUB ACTIVITIES

PHYSICAL

The benefits of regular physical activity are countless. It is the most natural way to improve both health and mood. Sadly, outdoor sports are on the wane these days due to the increasing popularity and availability of TV, computer and video games. Children while away hours and hours glued to the screens with joysticks in their hands. As a result they are becoming couch potatoes, facing health and behavioral issues. Kids Club wishes to address this growing problem by offering your child an opportunity to indulge in a range of physical activities depending on her taste and preference. Activities include:

Karate • Horse Riding • Table Tennis • Swimming • Gym • Gardening

LIBRARY

TV and video games have weaned away kids from reading books. We intend to bring books back into their lives. Reading habit not only improves concentration and vocabulary but also allows the reader a glimpse into other cultures. Kids Club has a growing collection of books and magazines that are available to all the club members to read and enjoy. Children are also allowed to bring their own books to read in the library if they wish so.

ARTS (Singing, Dancing & Painting)

Art is an important means of self-expression. Allowing children opportunities to express their thoughts and ideas freely not only unshackles their creativity but also improves their self-esteem tremendously. In fact, integrating artistic learning in education benefits children immensely by developing in them an appreciation of aesthetics. At Kids Club, children learn to express themselves in different ways - not just verbally. Even when these expressions are non-verbal, important learning and transference take place. They get to dance, sing, draw, paint and sculpt their feelings.

LANGUAGES

Learning a second language enhances children's cognitive development. Research stresses starting a second language as early as three years of age. The advantage for younger learners is that they have the ability to mimic closely the native pronunciation and intonation of a new language. Studies have shown that foreign language learning improves critical thinking, creativity and flexibility of mind. We are currently offering English & French, two of the most widely spoken languages in the world. More will be offered in future.

HOMEWORK ASSISTANCE

We wish to help both YOUR CHILD and YOU. KIDS CLUB has a team of counselors, selected for their experience and enthusiasm in working with kids. Our counselors will assist your child in completing the morning school homework. This will allow your family to enjoy the evenings together after Kids Club without having to worry about the homework.

We hope to see your kids at the KIDS CLUB.
